<tr>
<td>WAITRYST</td>
<td>should really be WAITRESS</td>
</tr>
<tr>
<td>RAE DOWN UNDER</td>
<td>should really be WAY DOWN UNDER</td>
</tr>
</tbody>
</table>

In other words, a misspelling means a GOOD horse
My premise is that there is someone out there doing all this crazy stuff

37 WAYS TO FIND A LONSHOT

IN UNITED STATES HORSE RACING

No.9 - Misspelling of a Horse's name

If there is a misspelling in the horse's name sounding peculiar

Like for example WAITRYST
Should really be WAITRESS

WAITRYST is misspelled, it should be WAITRESS:

TROPEZ should really be TROPAZ
LINDA V I should really be LINDA V
WAITRYST should really be WAITRESS
RAE DOWN UNDER should really be WAY DOWN UNDER

In other words, a misspelling means a GOOD horse

R. TABBERT
HORSE RACING CRYPTOGRAPHY

It should be noted by readers that horse racing is a giant video game. Some people have the codes and keys to this game to beat it. I claim to know some of the codes; but even though I once tried to beat it I found that it wasn't possible for two reasons; no. 1 I don't know all the codes. No. 2 it is true that the powers that be scramble the codes from time to time; they know when - you don't.

I never met the Mafia personally. I came the codes little at a time because I used to work at the race track. All sources of this information were accumulated over a 6 year period. (I did not learn all this information at once.

Sometimes I think that some people at the track are purposely giving out some of this information to make you believe that you actually have an edge over everyone else but in reality it could be a highly sophisticated psychological trick equating to what I call a "horse hook", analogical to a cocaine dealer getting new customers hooked.

I must tell the reader after being at the race track every day for 3 years straight (never missing a day) you start noticing things that the once a week patron doesn't.
No. 1: JOCKEY ON THE SAME NUMBER
MORE THAN ONCE IN A DAY OF RACING

If the jockey rides the same number more than once,
like lets say Patrick Valenzuala rides three 2 post positions in one day, he's riding the number 2 in
the first race; the number 2 again in the second
race; and once again the number 2 in the fifth race.
I was told in the summer of 1992 that this is some
kind of underworld code the insiders use and what
it means is that Patrick Valenzuela is going to be
first or second place on one of the 2s.

Therefore circle all jockeys that have the same number
more than once in a day. It will probably take
you a while to believe that this is true, but believe
me; it really does work this way!
NO. 2. A HORSE'S NAME WITH 2 WORDS

If a horse has 2 names; the letters in the first word and the letters in the second word must be equivalent in number. For example: "SPRING LAUNCH" has 6 letters and 6 letters or "SAL'S WISH" has 4 letters and 4 letters; qualifies.

NO. 3. A HORSE'S NAME WITH 1 WORD

If a horse has only one word in it's name; the number of letters 'divided' by two must be equivalent. For example: AFTO has 4 letters divided by 2 equals 2 and 2 or MIATUSCHA can be divided in half equivalently to 5 and 5 letters; qualify.
NO. 4: A HORSE’S NAME WITH 3 OR MORE WORDS

If a horse’s name has 3 words or more all of the letters are now counted and if the total number of letters can be divided in half equivalently; Qualifies.

For example: Girls who Care, the name of a horse has a total of 12 letters therefore the horse’s name can be divided in half to equal 6 and 6.

    GIRLS W/ H O C A R E
    1 2 3 4 5 6 1 2 3 4 5 6

"Her Elegant Ways" has 14 letters.

    N E R E L E G A N T W A Y S
    1 2 3 4 5 6 7 1 2 3 4 5 6 7

And can be divided into 7 and 7 letters. Both horses qualify. A horse like "C’MON LETS DANCE" do not qualify because it has 13 letters and can not be divided equally.
NO. 5: Jockey Rides Sequence Numbers

If a jockey rides sequential numbers the same racing day, he more than likely will come first or second, as long as his morning lines are below 10 on at least one of the numbers.

For example: a 3 post; a 4 post; a 5 post (just like a straight in poker) 4, 5, 6 or 9, 10, 11 or 1, 2, 3 he (the jockey) will try to win on one of these three spots. But notice that he may be listed as 1 first, then a 2, and then a 3 (out of order) but it still means sequential numbers: 2, 3, 4.
NO. 6: HORSE'S NAME HAS 3 A's

IF horse has 3 A's in its name and has never been heard of before (a new horse on the scene) and has 3 letter A's; it is a LONGSHOT! For example:

1) FOUR STAR ALL STAR (3 A's)
2) AMASTAR (3 A's)
3) MAN AT WAR (3 A's)
NO. 7: Horse's Name With Letters RT.

If a horse's name has the letter's RT in them (and in that order; not TR) and is the morning line favorite the RT is converted to the code: "The Right One".

But note; it must be the morning line favorite.

For example, the horse "Desert Stormer" or "Lonely Heart".

But remember; the horse has to be the morning line favorite to count; to be: "The Right One".

NO. 8: First Letter of Horse's Second Name and Jockey's First Letter of Last Name.

If the horses name has two words like "Sweet George" and the jockey's last name has the same first letter in the second name as his last name it is a longshot.

Sweet George = Gonzalez
No.9 - Misspelling of a Horses name

If there is a misspelling in the horse’s name sounding peculiar

Like for example WAITRYST
Should really be WAITRESS

WAITRYST is misspelled, it should be WAITRESS:

<table>
<thead>
<tr>
<th>Misspelling</th>
<th>Corrected</th>
</tr>
</thead>
<tbody>
<tr>
<td>TROPEZ</td>
<td>should really be</td>
</tr>
<tr>
<td>TROPAZ</td>
<td></td>
</tr>

</tr>
<tr>
<td>RAE DOWN UNDER</td>
<td>should really be</td>
</tr>
<tr>
<td>WAY DOWN UNDER</td>
<td></td>
</tr>
</tbody>
</table>

In other words, a misspelling means a GOOD horse
NO. 10: Jockey listed to ride in the second race will not win the third 70% of time

If a jockey is listed in the second race; 7 out of 10 times he will not win the 3rd race. But this does not mean he can not come in second place. True and observed for the Santa Anita Oak Tree meet-1993.

NO. 11: 2nd place horse in first same number that wins the 2nd race

The 2nd horse in the first race will often times be the same number that wins the 2nd race.

NO. 12: Similarity of horse’s names

If 2 horses have similar names such as Imprimis and Imprimatur and are racing the same day; one will win and the other will not such as happened November 13, 1993; Imprimus won and Imprimatur did not.

NO. 13: Certain names assigned to certain jockeys

Certain jockeys are assigned certain names of horses to win with. For example:

Gary Stevens = "Concept" horses. OR "Wild" horses

Laffit Pincay = "Winning or Win" "Wine" horses

"Eagle" horses
NO. 13 (CONT.)

PATRICK VALENZUELA = "MOON" HORSES
COREY BLACK = "WAR" HORSES
"QUEEN" HORSES
EDDIE DELAHOUAYE = "DESSERT" HORSES OR "DEVIL" OR "FLEET" HORSES

NOTE: Can you add or subtract from this list?

NAKATANI = "BLUE"

DESORMEAUX = "PROSPECTOR" OR ANY WORDS
STARTING WITH P. (P.P. HORSES)
ESPECIALLY IF THE WORDS ARE EQUIVALENT
IN THE NUMBER OF LETTERS.

PEDROZA = "BOY"
NO. 14: ANTI-THESIS JOCKEY WITH NAME HORSE

If the jockey who rides a Concept horse (G. Stevens) is in the race but not on "his" Concept horse attuned to his name; the Concept horse will not win; but the jockey (G. Stevens) WILL WIN ON THE OTHER HORSE!

Or another twist; another race; for example; Black (the jockey) does not ride his WAR horse in the second race but is not listed to ride in the second race. This therefore clears the way for the WAR horse and gives the signal that since Black is not riding the WAR horse that he will win a race near to the second race (He came second place on a longshot Wende in the first race).

Desormeaux  Stevens  Nakatani
NO. 15: P.P. Horse Theory

If the horse's name has 2 words and both words start with the letter "P"; this is known as a P.P. horse.

Two examples of P.P. horses that have won:

<table>
<thead>
<tr>
<th>P.P. Horse</th>
<th>Payoff</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Private Premier</td>
<td>$7.60</td>
</tr>
<tr>
<td>2) Posibly Perfect</td>
<td>$35.20</td>
</tr>
</tbody>
</table>
If a jockey wins 2 races in a day he will try to win a 3rd race. This is called the "The Holy Ghost" theory in horse racing. The FATHER is the 1st win, the SON the 2nd win and the HOLY GHOST is the 3rd. "It works more often than you'd expect."

See Solis next page. Solis on November 15, 1993 won 3 races. But at one point you see that both Solis and McCarron won 2 races so either jockey was able to ride the 3rd win. "the Holy Ghost."
MONDAY'S OAK TREE RESULTS

NO. 17: The "Chang"

Sources of this information were astounding! I had received this information from an ex-boyfriend of a woman who was related to owners and trainers of a horseracing dynasty. A "Chang" is a Chinese word (I believe) the same as the English word "change" but in horse racing a "Chang" is a slang term used for the meaning "does not change", describing in specific terms; the horses odds the last time out and the exact odds on the tote board 2 minutes before post time.

A "chang"is a Chinese word meaning for does not change.

A CHANG in horse racing means that if the odds of the horse goes off exactly the same it did the last time out (in other words the odds of the horse did not change compared to the last time he ran) the horse will win! You can find this out by reading the odds of the horse the last time he ran (are) listed in the right column of the Racing Form.

Here for example is a "chang" in the RACING FORM; where the horse won. Cotton Bloomers, on NOV. 11, 1993 went off at exactly 18.60 to 1; then on NOV. 25, 1993 the very next race it went off at 19.40 (almost the exact odds as last time). Because it went off at almost the same odds as last time it was a "chang"; the horse ended up winning as you see and there are many examples of this happening the same way in the Racing Form.
Here for example is a "chang" in the RACING FORM; where the horse won. Because it went off at almost the same odds as last time it was a "chang"; the horse ended up winning as you see and there are many examples of this happening the same way in the Racing Form.
The "Novelty" as it is called by the insiders (it is not my invention) came from the same source I received the information on the "chang"; the ex-boyfriend of a woman of the family of a horseracing dynasty.

The "Novelty" is when a horse has been bet down the last 3 or more times it ran but today (or the day it is running) suddenly it is not being bet down (the fans are finally letting the price of his odds go up). So the odds go up to 5 to 1 or higher; after his odds are normally 2 to 1 or so for the last 3 or more times. The odds of the horse the last 5 times he ran are listed on the right column of the Racing Form. My contention is that the "novelty" is a signal on the Tote Board for the jockey to win if his odds go up to exactly 5 to 1 or higher. NOTE: As I said in my introduction horses going off higher than 20 to 1 are usually a loser however you can make an exception for a "chang" (see no. 17) but not a novelty. I don't like novelty over 20 to 1.

The following page is an example of a "novelty" happening and there are many examples of this happening in the Racing Form. When a horse is always bet down then all of a sudden he is going off at 5 to 1 or higher (however - usually under 20 to 1). And the horse will win on a novelty price - which is a longshot price (but not sometimes there might be 2 novelty in the race or even also a chang - which makes the race a no play. But when there is only one novelty, then the horse is a play.

Fortune's Delight

Note that on May 29, My Turn to Star came 4th. It was not his turn to star. The horse went off at 4.65, a very borderline Novelty.

But note the very next race, Sept. 6, the fans finally let the price of the odds go up to 12.55 and the horse wins at this Novelty price after the horse was bet down heavy 8 times in arrow. Yes, now is his turn to star! And at a payoff of $27.00!

But note the very next race, Sept. 6 the race fans finally let the price of the odds go up to 12.55 and the horse wins at this Novelty price after the horse was bet down heavy 8 times in arrow. Yes, now is his turn to star! And at a payoff of $27.00!
On the day of the race Go for Gin was listed at 20 to 1 morning line. This gave me the idea that Go for Gin would be a Novelty since every time he ran was a short price.

The horse ended up going off at about 8 to 1 the perfect price for a Novelty. The crowd let the price go to above 4 to 1 (5 to 1 to 12 to 1 are ideal Novelty prices). And he won the Kentucky Derby!

The horse ended up going off at about 8 to 1 the perfect price for a novelty. The crowd let the price go to above 4 to 1 (5 to 1 to 12 to 1 are ideal novelty prices). And he won the Kentucky Derby!
19: The Diamond

Sitting in a restaurant we talked about the diamond and the mini-max. I asked what is a diamond? What is a mini-max?

He began to explain, "A Diamond is when the odds of the horse drops to half its price then the 3rd time it goes back up to the original price it started."

So the pattern is like this 30-15-30 on the horses odds or for example 80-40-80.

Vertically on the right column in the Racing Form the 'Diamond' will look like this:

Horse wins here
not here

So the lines drawn look like a Diamond.

Many people believe that since the horse's odds dropped half its price since the last it ran means that someone likes him better. But what this really means is you must wait! Wait until the third time it runs and if the horse goes off its original price it started it is a 'Diamond' and is a definite play.

On the following page is examples of horses winning on the top of their 'Diamond' and there are many, many examples of horses winning on a 'Diamond pattern of odds in the Racing Form.

The mini-max is too difficult to explain on paper, but the good news is, is that it is too much work for the bother.

The mini-max is too difficult to explain on paper, but the good news is, is that it is too much work for the bother.
See the pattern of the odds of Raja Jet. On Dec. 1, 93 the horse's odds went off at 17 to 1. Then on Dec. 17, 93 the horse's odds went off at 8 to 1 (exactly half of 17).

If one was aware of the principles of the Diamond that since the horse was bet to half its odds it went the previous time; one would not bet the horse! But at the end of the Diamond: Jan 1, 94 the horse goes off at 21 to 1 (almost exactly 17 to 1) its original odds of the Diamond. The horse came 2nd at 21 to 1!
See the pattern of the odds of Raja Jet. On Dec. 1, 93 the horse's odds went off at 17 to 1. Then on Dec. 17, 93 the horse's odds went off at 8 to 1 (exactly half of 17).

**And their are many other examples of Diamonds happening in the Racing Form.**
There are many other examples of Diamonds in the Racing Form.
NO. 20: The Million Dollar Move

The Million Dollar Move (M.D.) as it is called in Horse Racing is very specifically this; when a horse is in let's say 8th place coming down the stretch he'll remain in 8th place all the way to the finish line not losing more than 5 lengths. That's it? Yes folks that's it!! It looks something like this in the Racing Form:

1 4(2)4(3)5(1)7(4)8 9

Note that the small number on the right represents the number of lengths the horse dropped back. On the following page are examples of the horse making the Million Dollar Move and then comes right back the next race to win! Then the very next page is examples of false Million Dollar Moves where the horse freezes in the same post position but loses more than 5 lengths!

I forgot to mention that the Million Dollar Move is canceled if the horse is moving up above his normal class range.

Please understand this point or you will be deceived.
Deletante is my perfect example of a Million Dollar move horse! Especially on June 5, 1993.

Notice that the horse stays in the 6th position twice through the stretch not losing more than 5 lengths (the horse actually gains a length, which is acceptable). The very next next race July 1, 1993 the horse wins, being the product of the Million Dollar move! Then on Aug 26, 1993 the horse repeats the Million Dollar Nova to come second (2nd) on Sept. 10, 1993 as a product of that move.

---

Shuggleswon is also another fine example of the million dollar move. On Nov. 21, 93 and July 21, 93 you see the horse winning immeditlty after the move.

And you can find many examples of this happening in the Racing Form.
See the Million Dollar Moves for Madame L’enjoleur.' On Nov 28
the horse froze in the 9th position not losing more than 5 lengths. Then
the very next race, Dec. 19, the horse comes 3rd at 19.10 to 1!
The horse fails his chang June 27 (went off at 4 to 1 two times in a row, Aug. 23 the horse gives a false Million Dollar Move because although the horse froze in the 8th position down the stretch it lost more than 5 lengths (6 to be exact). Note that the horse gave another false Million Dollar Move April 4 when he froze in the 10th position but lost more than 5 lengths (6 to be exact).

Now we come to the horse's last race, Jan 1 and we note that the horse froze again in the 10th position but THIS time the horse loses only loses 3 and 1/2 lengths! Since the horse did something on the Million Dollar Move on then Nov 28 reading I would say that the horse has a chance at the longshot prize today. I do not know the result; I leave you to look it up yourself on the microfiche.
Please note that Desert Advance failed his Novelty the last two races. But if one were aware of the Million Dollar Move on Jan 1 (his last race) one would come to the conclusion that there is nothing wrong with this horse! Therefore the next race the horse is probably going to win! Note that on Jan. 1 the horse froze in the 6th position down the stretch not losing more than 5 lengths (4 and 1/2 to be exact). The horse has a chance and at a very big price! (P.S. I was too lazy to go to the Library and look him up on the microfiche to see if he won the very next race so I'll leave you the task.)

---

**What's curious about Cleret is that on Nov. 7, 1992, it made the million dollar move but failed the next race by coming 4th. Incidentally, Cleret also failed on a change on Jan 1st as well.**

**To point out what the million dollar move is not, here are various examples: Cleret on Nov. 15, 1993 froze on the 7th position twice but lost more than 5 lengths (11 lengths exactly). See also March 3, 93. Eddie's Star on Oct 10, 93 froze in the 10th position but lost more than 5 lengths (11 lengths exactly). Right Happy and Imperial Action also have false Million Dollar moves as you can see.**
As I write this it is February 2, 1994 and I think it

valid to mention that I discovered another code that appears to be
worthy, for on January 31, 1994 I was down in Tiajuana, Mex observing
Suburban Downs a Trotter Track and in the first race of the day the
horse named, "Our Pride and Joy". Notice the letter 'r' as the third
letter of the name! Well this horse won and I have seen other examples
of horses having the name with the third letter being an R.

I was also told that if the letter e is the second letter that
it could be a code but right now the letter r placed third in the
name seems more prominent.
22. Another Daily Double Secret

If the 5 horse wins the 1st race the horse right next to this number (the 4 or 6) wins the 2nd race.
Or for example the 3 wins the first race means the 2 or the 4 wins the second race.
Or for example the 1 wins the first race means the 1 or 2 wins the second race.
Or for example the 8 wins the first race the 7 or 9 wins the second race.
It happens more often than you would expect!! Also Note: Also consider the same number; for example the 8 wins the first; the 8 can also win the second! And so forth.

23. A Horse With A Letter's In
a 6 Furlong Race

I was told by a man on a bicycle (by the name of Paul) who rides his bicycle to Del Mar Race Track that a horse that has 4 letters only in its name (like TAJO for example) and is in a 6 furlong race in the 3, 4, 5, 6, 7 and 9 post position; it is a longshot!
TAJO was in the 3 post position (in May 1994) in a 6 furlong race and paid $29.00 to win! TouR was in the 4 post position in a 6 furlong race paid $4.40 to place! Keep watch on this new code!
24. Means More Than Just Cal Bred!

This $ means that the horse is bred in California, but I will tell the reader that it is also used for a unique coding system in the program.

If there are 4 out of 8-10 horses in the race that have this $ next to their name you can count on one of these 4 to win! Therefore 3 to 4 of these is the magic number!

(But if there are only 2 out of 8-10 this means nothing.) (Also if there is 5 to 8 out of 8 to 10 this also means nothing!)

So watch for a race that has 3 to 4 of these $ out of 8 to 10 of these $ and you'll instantly find the winner!
25. The Morning Line Code

If there are 3 or 4 horses next to each other in post position with odds under 10 to 1; the lowest post position wins. (on top of the string) or the post position wins the bottom.

For example: 3 or 4 in a row under 10 to 1.

Phone the Bride! 3 or 4 in a row under 10 to 1!
26. The Morning Line Equations
   For Figuring Out the Trifecta

A groom once told me that over 50% of all trifectas
are found within 5 horses in a race.

By finding the 5 horses simply add the morning line
and the weight (next to morning line in the program).

For example:
Morning line: 5/2
weight: + 117

\[
\begin{array}{c}
119.5
\end{array}
\]

The lowest five numbers are the five horses. Note:
there will sometimes be a tie with two horses, so both horses
for example could be tied at 119.5.
The 1, 4, 6, 9, 10 are the lowest totals and the trifecta is within these 5 (over 50% chance!) Note that the 9 is 5th choice at 7/2. But 5th choices often win as well as 4th choices.
Approximate Post Time 5:16 p.m.

TRIFECTA WITHIN THESE 5.
OVER 50% CHANCE
27. The Number 1 Post Position

It has been noted by my own observation of racing from 1932 to 1954 that the number 1 post position comes in to win exactly once a day throughout United States Race Tracks. It continues to be a mystery to me why this post position wins only once a day! But note that the number "1" will come second and third much more frequently.

Therefore take my advice and never bet the number 1 horse to win; your chances are statistically 101. But there will be a rare day where this will be an exception to "my rule".

28. The Date Horse

If a horse has won on the same date (not month but day) for example today is the 14th and the horse has won before on the 14th of the month he has a very good chance of winning again on this date! The next page is examples of date horses winning again on the same date and you will see many examples of this happening in the Racing Form.
If one was aware of the Date Horse concept, given to me by a groom named "Sandy," on the day of June 19, 94 one would realize that since the horse won on the 20th (Sep 94) the horse is a "date horse" on the 19th. The horse ended up winning again on this time of the month (perhaps winning for a horse is like a woman having her monthly incident!) Now today is the 11th (see upper left corner) the horse got 2nd on the 12th (July 94). But please note; THIS MEANS NOTHING - FOR A DATE HORSE MUST WIN !!!!! (as on the 20th and 19th).
See Lily's Moment win back to back on the 22nd of the month.
There will be skeptics saying this is a coincidence but if you examine the racing form closely you'll see a lot of these.

Onement is an excellent example of a "Date Horse" happening.
Saratoga Gambler won on the 9th of the month. Therefore his time to win is either on the 9th of the Month or slightly before the 9th, like the 7th or 8th would be acceptable for a date he would win on, but please note that he can not win after the 9th, because a true date horse wins again only on the exact date or slightly before this date(by one or two days only).
Also Saratoga Gambler has a chance on the 27th of the Month: therefore his next time to win would be exactly the 27th or two days before (the 25th and 26th). You can plainly see that Saratoga Gambler failed his Novelty on the 17th because it was not his time of the month to recieve his "welfare check".

So Saratoga Gambler called his worker and said "whats up with the check ?". The welfare worker responded, "Your time to get paid is on the 9th of the month or the 27th of the month" Saratoga Gambler respondeed back, "They're always fucking me around; why can't I get paid on the day I want ?" The Welfare worker responds, "You have to work with the system of when the computer wants to pay out, otherwise you'll be sanctioned for a period of 60 days".
29. The Number Holy Ghost

As mentioned in numbers 16 the jock — who wins two races, wins three races. This also works for numbers especially sequential numbers.

For example the 4 horse wins the first race the 6 horse wins the second race. This makes the 5 horse the holy ghost! So the 4 wins, the 6 wins, the 5 will win the next race or a race very soon! (4, 5, 6 sequential numbers as in poker).

Or else if the same number wins twice like the 7 horse wins the first and third race. The third 7 horse would be the holy ghost.
### 7136 FIRST RACE 1 mile, Three year olds. Claiming prices $16,000-$13,000, Purse $17,000.

31. If a Horse's Name has an "R" as it's 3rd Letter and has 13 Letters in Name.

Informed by a "British gentleman" who said his deceased Mother used to always play the horse that has the "R" as the 3rd letter of the name and has a total of 13 letters.

Please note that this code does not mean that this type of horse will win every time. But it does mean something and for the year 1994 I have seen this type of horse come 2nd and 3rd quite frequently. If you have speculation doubts please refer to the library. It contains tons of microfiche of newspapers across the United States giving the results of the races in the cities that have horse racing; for the year 1994.

3 examples of horses with the "R" 3rd and 13 letters:

PERSONAL SLAVE
1 2 3 4 5 6 7 8 9 10111213

FORGOTTEN WORD
1 2 3 4 5 6 7 8 9 10111213

FORWORD LEAGUE
1 2 3 4 5 6 7 8 9 10111213

NOTE: Even though I was told by the British man about the "R" being the 3rd letter; I've discovered that the "E" being the 2nd letter in the name and also having a total of 13 letters is also a significant code as I mention in no. 21 of this book.
32. If the E is second letter and the horse's name has 13 letters.

The same as 31 except the e is in the 2nd.

example:

HE'S A GOOD FIGHT
1 2 3 4 5 6 7 8 9 10 11 12 13

PERSONAL SLAVE
1 2 3 4 5 6 7 8 9 10 11 12 13

(note: personal slave also has the r third)

DEFENSE'S POINT
1 2 3 4 5 6 7 8 9 10 11 12 13

33. A horse that has a "Y" on the end of his name and also has a "W" in the name; is a good horse.

examples: Tinners

Watching Royalty

Here is the 4th race at the Meadowlands, New Jersey Tuesday, September 27th, 1994. Prior to the race I saw that Twelve Cylinders had the w and y but I at first failed to notice that the no. 6 Our New Day not only had the w, but the y was on the end. Our New Day won the race at a pay off of 60 to 1 ($128.60 for a $2 bet) !!!

MEADOWLANDS, NEW JERSEY Tuesday, SEPTEMBER 27th, 1994. 4:30p.m.

$6,500 CLM 3&up 6fur (12)
Post 5 4 3 2 1 EXACTA6M.Q.  TRIPECTA

1. POCKET KNIFE  6. homeister  116
2. CLASS HAT    12. turner  116

8. CAPT IN COMMAND  6. castillo  116
9. UNLIMITEDPOTENTIAL  15. lantz  111
10. FIRE BULLET  20. ortiz  116
11. HIGHER THRESHOLD  5/2. bravo  116
12. MIDNIGHT SUNNY  7/2. rydowski  116

PAYOFF: $128.60
7 to WIN!
34. Horse's with 4 sets of Double letters.

Horses that are named with 4 sets of Double letters is a very hard to detect code and means that it is a good horse.

VALUE THE VENUE
4 sets  2 u's  2 e's  2 v's  2(more) e's
(Note: Value the Venue has 2 set of doble e's)

S H E S E N C H A N T I N G
4 sets  2 s's  2 e's  2 n's  2 h's

"She's Enchanting" the four sets are well hidden!

S H E S M I N E A L L M I N E
4 sets  2 S's  2 e's  2 l's  2 n's

(note: even though it has more than 4 sets, it still has 4 sets !)

C H U B B Y  D U B B Y
4 sets  2 u's  2 b's  2 b's  2 y's

(note: Chubby Dubby has 2 double sets of b's (4 b's)).

A P A L A C H E  C H I C K
2 a's  2 h's  2 c's

Apalache Chick does not qualify, it has only 3 sets.(But it has 3 A's)
35. A Horse's name that has 2 A's and 8 letters.

   If a horse's name has 2 A's and a total of 8 letters in its name, it is a good horse.

Example of this type of horse:

   RAPAN BOY   (2 A's 8 letters)
   LA BALLET   (2 A's 8 letters)
   DYNATANE   (2 A's 8 letters)
   NAPA MILL   (2 A's 8 letters)
   ALTA BLUE   (2 A's 8 letters)
   NAVY BEAN   (2 A's 8 letters)

   These type of horses may have something more but who can say they'll win any given day --.
36. Horse's Name Has Another Name Hidden Within the Name.

It was told to me by Paul who rides his bike to Del Mar Satellite wagering. He revealed to me that there are certain signals going out when a horse's name has another name apparent, but the letters have to be together.

At the time I write this, October 11, 1994 I have to be honest with my reader and say that I am somewhat skeptical of this at the present time but the following are good examples of the horse "type" Paul was speaking of, especially when there is another word hidden in a horse's name with two or more words, so that when you connect the words together, there is another "entire" word within the two words combined. Here are some examples of horses that have won. Note that I have circled the word within the horse's name:

```

37. If the Same Number Wins 3 Times
   Especially in Allowance Races, the
   Same Number Will Win a 4th Time.

For example. The number 7 horse won three times.
There is then a very good chance that this same number
(the number 7) will win at least one more time that day.
Or for example the number 3 wins three times that day (at
the same race track of course) the number 3 will likely
win a fourth time that day.

This routine is hard to catch! But it should definitely
be considered for your late triples and doubles, if it comes
up. Skeptics should take a trip to the library and check
the microfiche - only then will you believe me?
